

THE TEAM

One teacher. A few AI agents.

Apostolos [SURNAME]

English teacher, 28th Primary School of Volos

Has taught this coursebook since 2005, to more than 40 sixth grades.

Before the classroom: ten years in computer systems and networking. MSc in Speech and Hearing Sciences, UCL.

ENGINEERING

Gemini in Google Antigravity writes the code. Claude reviews it, checks facts and made the launch video. Every teaching decision stays with the teacher.

THE ASK

We are not raising money. We are raising classrooms.

- 1 Pilot Unit 1 with your sixth grade this term.
- 2 Report what breaks: a typo, a wrong recording, a confusing screen.
- 3 Co-author one of Units 2 to 10.

ICT-REV · LARISSA

MOCK PITCH

English 6th Grade

The coursebook,
rebuilt for the screen.

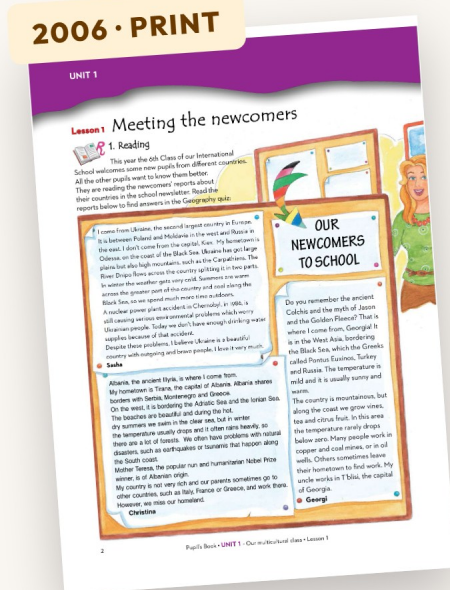

- Unit 1 live now · 1–2 October 2026

01 • THE PROBLEM

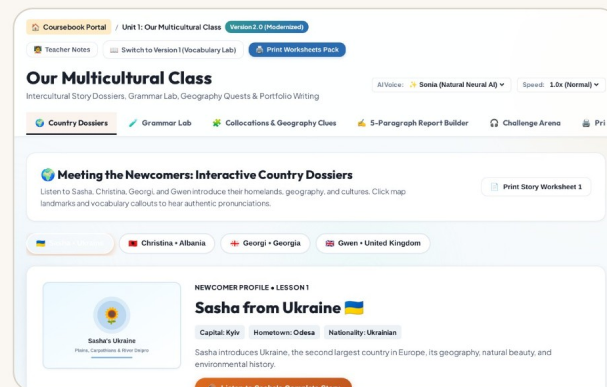

One book. Twenty years. No updates.

Greek state schools teach sixth-grade English from the 2006 Pupil's Book. Its maps, facts and exercises have stayed the same since.

02 • THE PRODUCT

Same lessons. Now they talk back.

- Country dossiers: the newcomers tell their stories aloud
- Grammar Lab with a fully voiced listening task
- Geography clues in place of the printed crossword
- Guided five-paragraph report builder
- Listening games and a can-do passport
- A worksheet pack that still prints

The printed book stays in pupils' hands. An errata shows teachers every change and the reason for it.

03 • THE NUMBERS

35

words, each with IPA, Greek, definition and example

216

audio recordings, all stored in the app

0

cloud calls: it runs offline

0

accounts, trackers or pupil data collected

BUSINESS MODEL

Free for every school. No data to sell, so nothing to monetise.

TRACTION AND ROADMAP

Sep 2026	First classroom run, sixth grade, Volos
Now	Unit 1 live
Next	Units 2 to 10, one at a time
