Hello Shalleen,

I was glad to hear that you want to spend your summer holidays in a crowded place by the sea. The island you are thinking of going is really beautiful, but when I was there with my parents last summer, _____

- 10.** Find information about an endangered animal and write a small report to appear in a school magazine. Explain why it is becoming extinct.

C. Reading

1. Read the following story taken from an environmental magazine and answer these questions:

- a. What is Bog Creek?
- b. What was its secret?

THE SECRET OF BOG CREEK

My name is Bob and this is my daughter Jeannie. A couple of times each month we travel up to the farmland of New Jersey to do a little fishing. We talk about school, friends, and sometimes even catch a few fish too!

For years, one of our favorite fishing spots was a stream near an old piece of land called Bog Creek farm. Although Bog Creek farm certainly looked normal, it had a dark secret.

Bog Creek farm looked like an average, everyday chicken ranch. However, some people used the farm as a place to dump their old chemicals and paints. These chemicals were dumped into a 150 foot long trench, about half as long as a football field, which stretched across the property. We knew about Bog Creek farm's secret because we fished so close to the property.

After a few years of secret dumping, a neighbor complained to local officials about the stinky smells that kept coming from the property. After talking it over with the neighbor, the officials decided to visit the owner of Bog Creek farm and check it out for themselves.

The owner told the officials that people had dumped chemicals into the trench on his property for as long as he could remember. After listening to the owner's story, the officials asked the owner to bulldoze the trench and ship the dirt to a special storage area. The owner agreed. However, even after the dirt was shipped away, the stinky smells continued.

A few months later, things started to get a little strange. Whenever my daughter and I went on one of our fishing trips, we began to notice...

2. Now, can you guess what Bob and his daughter began to notice? Write your answer and finish the story.

Example: ...hundreds of dead fish floating in the water. Plants didn't grow fast, the soil and area was polluted because of the chemicals, people and animals near the area felt sick, etc. People took action to clean the environment...
